### Descrição

#### Perfil pretendido Job Description

We are developing a proptech project and are currently looking for passionate Data Analysts (3) to join our Team. Multiple locations available.

The successful candidate will turn data into information, information into insight and insight into business decisions, as well as work and report directly with the firm top management in different countries.

#### Data Analyst Responsibilities:

Interpreting data, analyzing results using statistical techniques  
Developing and implementing data analyses, data collection systems and other strategies that optimize statistical efficiency and quality  
Acquiring data from primary or secondary data sources and maintaining databases  
Job Duties:

Data analyst responsibilities include conducting full lifecycle analysis to include requirements, activities and design. Data analysts will develop analysis and reporting capabilities. They will also monitor performance and quality control plans to identify improvements.

#### Responsibilities:

- Interpret data, analyze results using statistical techniques and provide ongoing reports
- Develop and implement databases, data collection systems, data analytics and other strategies that optimize statistical efficiency and quality
- Acquire data from primary or secondary data sources and maintain databases/data systems
- Identify, analyze, and interpret trends or patterns in complex data sets
- Filter and "clean" data by reviewing computer reports, printouts, and performance indicators to locate and correct code problems
- Work with management to prioritize business and information needs
- Locate and define new process improvement opportunities

#### Requirements:

- Technical expertise regarding data models, database design development, data mining and segmentation techniques
- Strong knowledge of and experience with reporting packages (Business Objects etc), databases (SQL etc), programming (XML, Javascript, or ETL frameworks)
- Knowledge of statistics and experience using statistical packages for analyzing datasets (Excel, SPSS, SAS etc)
- Strong analytical skills with the ability to collect, organize, analyze, and disseminate significant amounts of information with attention to detail and accuracy
- Adept at queries, report writing and presenting findings
- Fluency in English
