Descrição

Perfil pretendido Company Description

At Bosch, we shape the future by inventing high-quality technologies and services that spark enthusiasm and enrich people's lives.

With our Junior Managers Program (JMP), Bosch's accelerated program designed to attract and cultivate outstanding talents for advanced leadership, we offer a full individualized program, with a maximum of 6 rotations across various business segments and functions, as well as an international assignment, in which the participants will face challenging projects and global exposure. Every participant will be mentored by a seasoned career coach from top management and have access to the best training resources within the organization.

For our Mobility Electronic division located in Braga we're looking forward to your application. Are you ready for the challenge? Join in and feel the difference.

Job Description

As a JMP in the Controlling, Finance & Accounting department, you will get to know the diversity of controlling at Bosch – from factory controlling to business unit controlling:

Using tools such as Power BI to create reports and forecasts and support strategic planning;
A key aspect of your responsibilities will be active participation in the ongoing digitalization and automation initiatives within our business processes. This includes engaging in activities such as bot development and the integration of artificial intelligence to enhance operational efficiency;
In addition to cutting-edge digital projects, you will be engaged in traditional tasks like transfer pricing, M&A, and the development of robust business cases.
At Bosch, we believe that leadership involves continuous personal and professional growth, as well as the ability to inspire and develop others. You will have the opportunity to influence existing processes and work towards challenging, entrepreneurial, and meaningful goals.

Together we will lay the foundation for Your Future as a Leader.

Qualifications

Personality: You have a sense of numbers and an eye for the big picture. In addition, you are enthusiastic about digitalization and are IT-savvy. You enjoy inspiring other people. You consider courage, openness, tolerance, and mindfulness to be desirable attitudes.

Background: You have completed your master's or diploma degree in business administration, economics, business informatics, industrial engineering or comparable with above-average results. You are already familiar with topics such as economic planning and KPI systems. Maybe you already have an MBA, PhD or first work experience.

Experience and know-how: You have professional experience of at least three years and have gained practical experience through demanding subject or related internships, preferably in medium-sized companies or start-ups. You are proficient in Portuguese and English (German would be a plus). Preferably, you have international experience of at least three months.
