

AUTODESK® REVIT® STRUCTURE

CERTIFIED PROFESSIONAL EXAM

Safety. Performance. Quality. These are the cornerstones of structural engineering. As you seek to elevate your career to new heights, transform yourself into a Certified Professional with Autodesk Revit Structure®. This software is the industry standard that drives structural design and analysis.

Becoming an Autodesk Certified Professional can lead to accelerated career development, improved productivity, and enhanced credibility. In short, it can help get you where you want to go.

PREPARE FOR SUCCESS

Your preparation for the exam will be critical. As Autodesk's exclusive provider for the Certified Professional program, Certiport makes Autodesk Revit Structure® certification easier with a powerful three-step pathway:

1. LEARN

Obtain the skills you need to use Autodesk Revit Structure® at a professional level. Certiport offers content-rich textbooks, online courseware, video resources, and more.

2. PRACTICE

Refine your skills with interactive exam-preparation tools and practice tests. Build the confidence you need to take the Autodesk Revit Structure® Certified Professional Exam.

3. CERTIFY

Validate your skills by passing the exam and receiving your official certificate.

RECOMMENDED EXPERIENCE LEVELS

There's no substitute for training and hands-on experience as you prepare for your exam. Certiport recommends the following:

Training — Revit Structure® 2015 course (or equivalent)

Hands-on Experience — 400 hours

THE TIME IS NOW

As an Autodesk Revit Architecture® Certified Professional, you'll enjoy several career-boosting benefits:

- Prove your skill level with an official, industry-standard credential recognized by employers
- Display the Autodesk Certified logo and your certificate
- Include your name in the database of Autodesk Certified Professionals

WHAT'S ON THE EXAM?

Refer to the chart on this page for a list of skills covered by this exam.

AUTODESK CERTIFICATION EXAM TOPICS AND OBJECTIVES

The Autodesk Certified Professional exam contains 35 questions. The majority of these require you to use Revit Structure to create or modify a data file, and then type your answer into an input box. Other question types include multiple choice, matching, and point-and-click. You will have a two-hour time limit (in some countries, the time limit may be extended).

The chart below shows you the skills you will be expected to demonstrate on the exam. Keep in mind that some of the skills listed may not be tested on your specific certification exam; however, you should be prepared to demonstrate your mastery of them all.
